Address: Village Kot Pero shah p/o Chuck Uggu district & tehsil Gujranwala Pakistan , 52331, Gujranwala, Pakistan (Home)

● ABOUT ME

Information Technology graduate and AI Intern at Brackets Pvt. Ltd. under Punjab Government's CMITP, with hands-on experience in software development, data science, machine learning, and AI. Experienced in building web applications and data-driven solutions, with a strong foundation in software engineering, databases, analytics, and problem solving. Passionate about developing scalable, intelligent solutions for real-world challenges.

● WORK EXPERIENCE

SOFTWARE DEVELOPER – GHANI BRANDING AGENCY – 01/10/2025 – Current – GUJRANWALA, PAKISTAN

Contributed to innovative projects as a Fullstack Engineer, leading both frontend and backend development using technologies such as HTML, CSS, JavaScript, PHP, Laravel, SQL, Bootstrap, and ReactJS. Worked closely with the team to deliver responsive, high-performance web applications and improve user experience through seamless integration of various technologies.

SOFTWARE DEVELOPER – AIMGET SOLUTION – 01/06/2023 – 30/09/2025 – GUJRANWALA, PAKISTAN

- Developed and maintained full-stack web applications for immigration, legal, and administrative systems with a focus on scalability and security.
- Designed and implemented modular backend logic, dynamic RESTful APIs, and clean MVC architectures to support complex workflows.
- Optimized database structures and performance to enable efficient data handling, reporting, and analytics.
- Collaborated with cross-functional teams to deliver responsive, research-driven UI/UX solutions aligned with user needs.
- Applied analytical and problem-solving skills to improve system efficiency and support data-driven decision-making.

SOFTWARE DEVELOPER – SIZDOM TECHNOLOGY – 10/02/2023 – 15/05/2023 – GUJRANWALA, PAKISTAN

- Designed and implemented web pages using modern web technologies.
- Collaborated on relational database design and management.
- Assisted in delivering client-focused digital solutions.

ARTIFICIAL INTELLIGENCE INTERN – BRACKETS PVT LTD (CMITP BATCH 2) – 14/07/2026 – Current – GUJRANWALA, PAKISTAN

- **AI & Machine Learning:** Applied Python, data analysis, preprocessing, and machine-learning workflows to practical healthcare datasets and AI projects.
- **Data Science:** Performed exploratory data analysis, statistical analysis, visualization, feature preparation, and healthcare data analytics.
- **AI Development:** Developed and evaluated machine-learning workflows using Python and Scikit-learn, with focus on practical AI applications.

- **Software & Database Development:** Built healthcare-oriented software components using Python, SQL, SQLite, Laravel, and web technologies.
- **Version Control:** Applied Git and GitHub workflows including repositories, commits, feature branches, pushes, merges, and project documentation.

● **EDUCATION AND TRAINING**

24/11/2020 – 29/11/2024 Gujranwala , Pakistan
BSIT - BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY Govt Islamia Graduate College Gujranwala

I developed a **web-based service marketplace platform “BeautyProfessional”** for connecting beauty and wellness professionals with customers, using **Laravel (PHP), MySQL, JavaScript**.
This project was conducted under the guidance of **Professor Muhammad Asif** at **Islamia Graduate College Gujranwala**. Throughout the project, my supervisor provided valuable guidance in system design, feature prioritization, and performance optimization.
The **usability and multilingual content management** aspects of the platform were reviewed and validated by **Professor Usman Ahmad HOD Computer Science Department** to ensure professional standards.

Website <https://gicg.edu.pk/> | **Thesis** Thesis (Final Year Project): -

01/09/2018 – 31/05/2020 Gujranwala, Pakistan
ICS Govt Degree Boys College Qila Didar Singh Gujranwala

● **LANGUAGE SKILLS**

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

● **SKILLS**

Programming

Python | PHP | java | c | C++ | JavaScript

AI / Data Science

Artificial Intelligence | Data Science | Machine Learning | Matplotlib | scikit-Learn | NumPy | Pandas | Scikit-Learn | Neural Networks and Deep Learning | Jupyter Notebook | OpenCV | Seaborn | Tensorflow | PyTorch | Deep Learning | Artificial Neural Networks | Computer Vision | Natural Language Processing | Data Preprocessing

Web Development

• React | Next | node | LARAVEL | HTML | CSS | Nestjs | Express.js | BOOTSTRAP | jQuery

Database

SQL | MySQL | SQLite | Database Management | MongoDB

Software Engineering

Git | Object-Oriented Programming | Github | Data Structures | Version Control | Algorithms

● **HOBBIES AND INTERESTS**

Artificial Intelligence & Data Science

Technology & Software Development

• **Cricket**

● RECOMMENDATIONS

Prof.Usman Ahmad Assistant Professor & HOD, Department of Computer Science

Former course instructor during my BSIT degree, who taught me core Computer Science subjects and evaluated my academic performance. He is familiar with my technical skills, research interests, and work ethic.

Email usmanahmadawan@gmail.com | **Phone** (+92) 3216433134

Prof.Muhammad Asif Assistant Professor of Computer Science

Final Year Project (FYP) supervisor during my BSIT degree. Guided me in planning, developing, and implementing my project, and can attest to my problem-solving abilities, teamwork, and research potential.

Email masif.uosgrw@gmail.com | **Phone** (+92) 3216459596

● PROJECTS

AI-Enabled Healthcare Queue & Appointment Management System (QMS)

Developed a full-stack healthcare QMS with patient, doctor, and admin portals, appointment scheduling, live queue management, follow-ups, and medical records. Integrated AI-assisted symptom assessment, conversational intake, risk screening, medical report processing, and intelligent doctor routing.

Tech: TypeScript, NestJS, Node.js, MongoDB, Mongoose, REST APIs, JWT, OpenAI API, Git/GitHub

Healthcare AI System

Python | REST APIs | SQL | SQLite | Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn | Git/GitHub

Built an end-to-end healthcare AI pipeline integrating **SQL/SQLite, REST APIs, Python data processing, EDA, visualization, and ML preparation**, with API-based JSON retrieval and Git/GitHub version control.

Mhow Website

• Developed backend functionality using Laravel for an NGO website with modules including donations, event management, project listings, volunteer registration, and admin panel features. Integrated dynamic content handling, email services, and metadata management.

Link <https://mhow.org/>

Safe Capital

Investment & Referral Platform – Built a dynamic system with automated daily returns, 7-level referral commissions, monthly salaries, milestone rewards, withdrawal fee deductions, and a fully editable admin panel with email OTP login, live chat, and customer support.

Tahzeel Services – UAE-Based Multi-Service Platform

Role: *Full-Stack Laravel Developer* Developed a dynamic, multilingual web platform offering over 30 UAE-based government and business services (e.g., Amer, Tasheel, DED, Real Estate, PRO, DHA, Legal, and VAT). Built using Laravel for backend and Blade/Bootstrap for frontend. Features include service categorization, content management via admin panel, FAQs, testimonials, and region-specific content for India, Nepal, and GCC countries.

Link <https://tahzeel.ae/>

Constructive Solutions

Constructive Solutions is a comprehensive platform for construction services, project management, and client collaboration. It showcases various construction solutions, project portfolios, and client testimonials. The platform features a modern design with service listings, contact options, and an admin panel for efficient project tracking and management.

Link <https://www.constructivesolutions.io/>

Ginvoice

GInvoice Admin Panel is a centralized management system designed to control and monitor all invoicing operations. It allows administrators to manage users, clients, invoices, payments, and reports from a secure dashboard. The panel provides full control over financial data, system settings, and activity tracking, ensuring smooth, organized, and efficient invoice management.

CarTradez

CarTradez is a user-friendly online platform designed for buying and selling cars. It showcases a wide range of new and used vehicles with detailed listings, images, and specifications. The platform features a modern design with easy search, comparison options, and a contact system, making it simple for buyers and sellers to connect and trade vehicles smoothly and securely.
